April 22, 2015

Dear Resident,

Millennium Pipeline Company LLC. Will be performing maintenance activities at its facility located in Orange County, NY.
Specifically, beginning on Wednesday morning, April 22, crews will be on-site in preparation for the necessary pipeline maintenance activities scheduled from April 22 to April 26th within the facility located off State Route 209 in Orange County, NY.

In order to complete this work, it is necessary to perform some controlled ventilation of gas from the piping within station. During the venting, residents in the area may smell the odor associated with natural gas. There could also be some noise impact associated with this work and is necessary to accomplish the scheduled work.

When all pipeline maintenance work is completed, the facilities involved with the controlled release of natural gas will be restored to normal service. I would like to stress that these operations are safe and will be conducted by qualified employees. These employees will ensure the public and contractors safety during these activities.

For pipeline or gas emergencies, please contact our Monitoring center at (800)-835-7191

The Orange County 911 centers, local fire, police departments and municipalities have been notified of these activities.

If you have any questions or concerns, contact Millennium Pipeline Company at (877)-213-1944.

Thank you.

Sincerely yours,

Millennium Pipeline Company LLC.
