

A GREEN TOMORROW  
STARTS TODAY.

## IWS operates with a consistent focus on sustainability.

-  Recycling is the cornerstone of our commitment to environmental protection.
-  IWS landfills are operated by teams of engineers and compliance and safety experts who use modern equipment and techniques and abide by the most stringent environmental standards.
-  Our environmental initiatives include recycling education, the reduction of transfer station odor, cutting-edge gas-to energy project, management of contaminated landfill wastewater and electronic end-of-life projects.

**WE SUPPORT THE COMMUNITIES WE SERVE AND INVEST IN PIONEERING RESEARCH TO ENSURE A GREENER FUTURE FOR US ALL.**

## OUR MISSION:

*An unwavering commitment to becoming the nation's leading independent and fully integrated solid waste management company: employing the best people, providing superior customer service, innovative solutions and the highest standard of excellence with uncompromising respect for the environment.*

## IWS By The Numbers

-  Our team of over 500 skilled employees serves more than 15,000 commercial and industrial customers throughout the northeast.
-  We maintain a modern fleet of nearly 250 vehicles, 8 transfer stations, state-of-the-art recycling facilities, 5 landfills and a wide selection of commercial, roll-off and compaction containers.
-  In a recent customer satisfaction survey, IWS received a score of 90% or higher for superior customer service and reliability.

## E-WASTE RECYCLING SERVICES

**SERVING YOU.  
PROTECTING OUR ENVIRONMENT.**

## E-WASTE RECYCLING SERVICES

Federal and State regulations require individuals, businesses and organizations to dispose of non-working and obsolete electronic waste products in an **environmentally sound manner**. These regulations are meant to prevent selected high technology products from ending up in landfills where **toxic elements could leach into the water system**.

Computers and electronics may contain **hazardous waste elements** such as lead solder, mercury, cadmium and beryllium. Monitors, CRT's and televisions may have anywhere from 4 to 8 lbs. of lead.

Although consumers may be exempt from regulation or penalty in some areas, **we encourage everyone to be environmentally conscious**. Corporate and institutional clients should call Interstate Waste Services to help facilitate and coordinate turnkey electronic recycling programs.

## LIST OF ACCEPTED EQUIPMENT:

- Typewriters
- Computers
- Printers
- Cell Phones, PDAs, IPODs
- Circuit Boards
- Electronic Scrap
- Fax Machines

## WHERE DOES IT ALL GO?

Interstate Waste Services has conscientiously subscribed to the "Three R's":

- 1) **Reduction of waste** through advanced, proprietary sorting, processing, and tracking systems.
- 2) **Reuse** of equipment whenever possible.
- 3) **Recycling** practices from start to finish.

\*\*\*About 90%, is disassembled (de-manufactured) and recycled on a materials basis (metals, plastics, etc.)
