**LOCAL LAW NO. 2 OF 2016**  
**A LOCAL LAW ADOPTING THE**  
**NEW YORK STATE UNIFIED SOLAR PERMIT AS AMENDED**  
**FOR APPLICATIONS FOR**  
**SMALL SCALE, ROOF MOUNTED,**  
**RESIDENTIAL SOLAR GENERATING FACILITIES**  
**IN THE TOWN OF DEERPARK,**  
**ORANGE COUNTY, NEW YORK**

Section 1. Purpose. It is recognized that there are some uses which, because of their very nature, are recognized as having potentially beneficial characteristics having the potential to benefit both local citizenry and society at large; that although there are significant potential benefits, there are aspects of such a use that make minimal review and regulation in order to benefit the health, welfare, enjoyment and well-being of the citizens of the Town of Deerpark and those who live within the Town; and that the modest review and regulation of such activities is necessary to insure that these uses will not contribute to the blighting or downgrading of neighborhoods. It is further recognized that because the Town of Deerpark is a small residential town, the proliferation of such uses could dangerously affect the welfare of the entire community and a regulation is required in order to prevent such endangering. Residential solar uses and the operational characteristics of such uses are this kind of use.

Section 2. Legislative Findings.

A. The increase in state and federal support for non-petroleum based, renewable energy source uses, including the desirability of residential solar energy generating facilities being proposed to be located within the County of Orange, provide a possibility for a significant increase of having a potential number of individuals, companies and/or property owners seeking to create, establish and/or operate residential solar use facilities.

B. The Town of Deerpark Town Board has determined that it is appropriate to monitor the installation of residential solar use facilities while still enabling said use without substantial regulation and cost to local property owners. Based upon studies and evaluations examining regulation of

residential uses throughout the State of New York, the Town Board of the Town of Deerpark has determined that an appropriate methodology to monitor small scale (less than 23kW), roof mounted, residential solar energy uses without significant cost to, or interference with, property owners is to utilize an adaptation of the New York State Unified Solar Permit in addition to or as an alternative to the existing Town Law in order to accomplish the state purposes of the Town Board.

C. SEQR Requirements \_\_\_\_\_

RESET FORM

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

**Determination of Significance - Type I and Unlisted Actions**

SEQR Status:       Type I                       Unlisted

Identify portions of EAF completed for this Project:     Part 1                       Part 2                       Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the \_\_\_\_\_ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
